Wollongong City Council

Attachment 3 Revenue Policy, Rates, Annual Charges and Fees 2026-2027

Draft for Exhibition

This page has intentionally been left blank.

Revenue Policy

Council's Revenue Policy, Rates, Annual Charges & Fees 2026-2027 outlines policy and pricing for those areas that Council receives income. The Revenue Policy is developed as part of the Operational Plan each year.

There are several sources of income available for Council, however, Rates income remains the predominant source of income and is supplemented by statutory and other charges, user fees for services, grants and income from commercial endeavours.

RATES

The total amount of rate revenue to be collected from registered property owners at the commencement of a rating year (General Income) is set by Independent Regulatory and Pricing Tribunal (IPART) on behalf of the Minister for Local Government. This process, known as the 'Rate Peg', sets the percentage (3.9% for 2026-2027) the Council can increase its General Income. The IPART Rate Peg of 3.9% includes a Base Cost Change of 3.0%, an Emergency Services Levy (ESL) factor and ESL subsidy catch up adjustment of 0.2%, an election cost adjustment of -0.1% and a population factor adjustment of 0.8%.

Council determines the allocation of rates to each property based on categorisation, property values (unimproved land values), pricing and the application of a base charge or minimum rate, for each category or sub-category. Council has not varied its categorisation structure for Ordinary Rates since 1994, although did introduce a Base Charge for Residential properties in 2001-2002.

Ordinary Rates

Council's rating structure contains the four primary categories of Ordinary Rates (definitions provided in glossary) being:

- Residential
- Farmland
- Mining
- Business

The Business category is a residual category, which means any property that cannot be categorised as Farmland, Residential or Mining will be categorised as Business. Not all properties within the Business category will, therefore, be operating a 'business' in the ordinary sense of the word.

Council has divided the Business category into sub-categories to provide additional differential allocation to various property types within the category:

- Business – Ordinary
- Business – Commercial
- Business – 3 (c) Regional
- Business – Light Industrial
- Business – Heavy Industrial
- Business – Heavy 1 Activity 1.

All property owners are notified of their categorisation for rating purposes through their annual Rate Notice or in writing during the prior period where the categorising has been changed.

Special Rates

In addition to Ordinary Rates, Council levies a Special Rate that applies to Business properties within a defined area called the Wollongong Mall Special Rate.

- Wollongong Mall Special Rate

This rate will be levied on business properties in the defined area to provide Council with revenue to defray expenses in connection with the management, promotion, working, maintenance, cleaning and provision of additional works and services for the Wollongong Mall and its environs.

Categorisation Maps

Maps showing property categorisation, sub-categorisation and special rates are available for perusal on Council's webpage at <https://wollongong.nsw.gov.au/book-and-apply/pay-your-rates/rating-categories>.

The below table shows Council's rating structure, number of rateable properties and pricing proposed to be applied for the 2026-2027 rating period.

Rating Structure and Pricing 2026-2027

Rating Category	Sub-Category	Number of properties	Ad Valorem Rate*	Base or Minimum Amount \$	Notional Income Yield \$
Residential **		83,377.55	0.00139251	\$897.46 (B)	149,655,269
Farmland		106.00	0.00106945	\$1239.08 (M)	640,276
Business	Ordinary	296.00	0.00144821	0.00	58,169
	Commercial	2,116.97	0.00960829	\$1239.08 (M)	25,146,602
	3c Regional Business	279.48	0.00960829	\$1109.52 (M)	5,809,337
	Light Industrial	1,498.00	0.00744156	\$571.12 (M)	9,678,252
	Heavy Industrial	483.00	0.01146034	\$1239.08 (M)	12,528,498
	Heavy 1 Activity 1	39.00	0.01740077	\$1109.52 (M)	13,200,113
Mining		13.00	0.01519226	\$1239.08 (M)	2,481,666
Special Rates	Wollongong Mall Rate	71.50	0.00584805	0.00	1,374,450
TOTAL					220,572,634
* The Ad Valorem Rate is the amount the land value is multiplied by to calculate individual Rates. This is shown in the same way on individual Rate Notices.					
** The base amount for Residential Properties makes up 50% of the total revenue for Residential.					
(B) = Base Amount, (M) = Minimum Rate					

Council's General Income from rates is proposed to be indexed by 3.9% in line with the IPART approved increase. Council generally maintains pricing relativity between categories, so while the General Income will increase by 3.9%, due to the changing makeup of rateable properties within the Council area (including rates becoming exempt, objections to valuations, changes of use and changes to valuation allowances) the average impact to rate payers is slightly higher than the overall percentage change in General Income. In addition, the impact on Residential rate payers varies because of the 50% base charge that has a fixed dollar amount in addition to the variable portion. Low valued properties will have lower percentage increases, while higher valued properties will increase above the average percentage.

Land Valuations

Land valuations are determined by the NSW Valuer General and are used in determining the ad valorem amount applied in the allocation of rates to be issued by Council. A general revaluation of land within Council areas usually occurs every three years. Council rates for 2026-2027 will be calculated using existing valuations determined as of 1 July 2024.

Pensioner Rebates

- Mandatory Rebate

Council is required by the NSW State Government to provide a mandatory rebate fixed at a maximum of \$250.00 to all 'eligible' pensioners if they hold a Pensioner Concession Card from Centrelink. A pensioner concession will only be granted for the current rating year. The amount of the rebate will be proportioned according to the number of full quarters in the rating year after the commencement of pensioner eligibility.

An eligible pensioner must:

- Be the owner or spouse of the owner and reside at the property.
- Hold either a Pensioner Concession Card (PCC) or,
- Gold card embossed with 'TPI' (Totally Permanently Incapacitated) or,
- Gold card embossed with 'EDA' (Extreme Disablement Adjustment).

If the land is jointly owned by others who are not the spouse of the eligible pensioner, the rebate will be apportioned based on the percentage of the ownership for the eligible pensioner residing at the location.

- Voluntary Rebate

A Voluntary Council Rebate will apply to eligible pensioners who received the Mandatory and Voluntary Council Rebate under Section 582 of the Local Government Area prior to 1 January 1994. The Voluntary Rebate of rates will be adjusted annually by the same percentage increase as has been applied to rates. The Voluntary Rebate for 2026-2027 will be \$329.36.

Council will verify the concessional eligibility of pensioners on a regular basis. If eligibility cannot be confirmed, the rebate will be reversed for all following full quarters of the year. A letter will be forwarded to the ratepayer advising the rebate has been removed from the account and any balance remaining to be paid.

Pensioners' Deferral Scheme

Council offers all eligible pensioners in receipt of the mandatory rebate or those who meet Council's criteria as a self-funded retiree an option to enter into a formal Pensioner Agreement to Defer Rates, Charges and Interest. The ratepayer should contact Council to discuss further options available.

Council will apply a reduced interest rate equivalent to the IPART Local Government Nominal Discount Rate to those eligible ratepayers who have entered into a formal Pensioner Agreement to Defer Rates, Charges and Interest.

ANNUAL CHARGES

Council provides a range of services for which it charges an annual charge authorised under various sections of the Local Government Act 1993 as below.

Stormwater Management Annual Charge

Council will levy a Stormwater Management Charge on all parcels of rateable land within the urban area of the City of Wollongong categorised for rating purposes as 'Residential' or 'Business' (including all sub-categories), not being vacant land, or land owned by the Crown, or land held under a lease for private purposes granted under the Housing Act 2001 or The Aboriginal Housing Act 1998.

The following charges will apply:

Category	Number of Properties	Rate \$	Per Unit	Notional Income Yield
Land categorised as residential (not being a strata lot)	58,320	25.00	Assessment	1,458,000
Residential strata lot	20,573	12.50	Strata Lot	257,163
Land categorised as business (not being a business strata lot)	2,543	25.00	Per 350 sq metres*	197,936
Business strata lot	1,663	25.00	Per 350 sq metres**	19,939
* Cap at a maximum of \$100.00				
** or part of the area of land upon which the lot exists capped at a maximum of \$100.00 and divided by the number of business strata lots on that area of land to the minimum of \$5.00				

Domestic Waste Management Service

Council levies a Domestic Waste Management Service charge for the provision of Domestic Waste Management services to all residential rated properties. The services can include weekly collection of general waste (red lid bin), weekly collection of Food Organics & Garden Organics (green lid bin),

fortnightly collection of recyclables (yellow lid bin) and two on-call household clean up services each financial year. Access to an annual green waste and a cardboard drop off service is also included.

The Domestic Waste Management Service charge is based on the size of the general waste bin provided. A minimum of one Domestic Waste Management Service charge is to be levied for each separate dwelling upon a property whether the dwellings are subdivided or not. A separate dwelling for the purpose of this Policy is defined as being self-contained and/or leased on the open market. Where a residential property is vacant a service availability charge (Vacant Land Charge) will apply, upon request to Council.

Council cannot apply income from Ordinary Rates towards the cost of providing domestic waste management services. In determining the annual Domestic Waste Management Service charges, Council must include all expenditure that relates to the delivery of this service and may include provision for future increases to allow for equalisation of pricing from year to year. This is considered a prudent approach as the waste area is subject to changing industry regulation, costs and operational requirements that have the potential for significant variations in the future. Equalisation funds, along with any annual improvements beyond planned results for the delivery of the domestic waste service, are held as an externally restricted asset.

The charges for the provision of the total service during the year commencing 1 July 2026 are proposed to be:

Domestic Waste Management Service	General Waste Bin Size	Annual Charge \$	Estimated Yield \$
Domestic Waste Small	80 Litre	409.00	9,155,465
Domestic Waste Medium	120-140 Litre	545.00	31,702,105
Domestic Waste Large	240 Litre	1,035.00	9,241,515
Compassionate Grounds	240 Litre	545.00	39,785
Vacant Land charge	N/A	38.00	48,070

Property owners can decrease the size of their general waste bin throughout the year without an administration fee. Where property owners nominate to increase their bin size, an administration fee of \$200.00 applies. New charges for the elected bin size are applied on a pro rata basis from the date of delivery.

Additional Domestic Waste Bins are available to domestic properties and are priced as shown below. Where additional bins across all service types are required or an additional waste bin is required, these will be charged as an additional full annual Domestic Waste Management Service charge.

Additional Domestic Waste Management Bins	Bin Size	Annual Charge \$	Estimated Yield \$
Weekly Food Organic & Garden Organic	240 Litre	133.30	252,470
Fortnightly Recycling	240 Litre	63.40	53,890

- Domestic Waste Management Services - Wheel Out Wheel Back Service Voluntary Rebate

Eligible residents can apply for the 'Wheel Out – Wheel Back' service to assist with having their bins placed out for collection and returned to their property each week at an annual fee of \$332.00. The application process will involve an on-site inspection, indemnity agreement and evidence demonstrating the long term medical condition that prevents bins from being presented to the kerb.

- Domestic Waste Management Services – Subdivisions, New Developments and Multi Unit Dwellings

Where a domestic property has been subdivided or newly developed, Council is required to levy a new Domestic Waste Management Service charge. When this occurs, a Medium Domestic Waste Management Service charge will be levied from the date of registration, on a pro rata basis, unless otherwise notified by the property owner. For vacant land, a Vacant Land Charge will be levied from the date of registration upon application to and approval by Waste Services on a pro rata basis.

- Domestic Waste Management Services – Bin Rationalisations in Multi Unit Dwellings and Complexes

Where a multi-unit complex has restricted capacity to store waste and recycling receptacles, Council may issue a bulk waste bin or larger mobile garbage bins to equal a waste disposal capacity for each unit within the complex of Small, Medium or Large, based on the Domestic Waste Management Service charge.

Where a bin rationalisation is implemented, all property owners will be levied the same Domestic Waste Management Service charge. It is up to each individual owner/complex to present the bins for collection at a designated collection point.

For complexes wishing to reduce the number of bins at their property, Council will require minutes from a strata meeting demonstrating that the application of a standard Domestic Waste Management Service charge across all units has been adopted by a quorum.

- Disputed Domestic Waste Management Charges

The annual rate notice issued in July includes details of the Domestic Waste Management Service charge attributed to each property, including any additional bins or services. Where it becomes known that charges have not been levied correctly, Council will verify the rate and bin size and apply an adjustment to the current rateable year. If the error relates to multiple years, the adjustment will be processed to a maximum of one previous rateable year. All adjustments will be limited to the date of property ownership.

Residents must pay their rate instalments as issued and any amendments agreed to will be adjusted on the next instalment notice.

Waste Management Services – Non-Domestic

In accordance with Section 501 of the Local Government Act 1993, Council will levy an annual charge for the provision of waste management services to non-domestic and exempt properties where requested by the owner and approved by Council. Waste means garbage, being general refuse other than effluent as defined in the Local Government Act 1993 dictionary and trade like waste. The Non-Domestic waste service is intended for small waste generators and is limited to one service per rateable property. The service will include weekly collection of general waste, weekly collection of Food Organics & Garden Organics and fortnightly collection of Recyclables. A Non-Domestic Waste Management Service charge does not include provision for on call household clean-up or drop-off services.

Non-Domestic Waste Service *	General Waste Bin Size	Annual Charge \$	Estimated Yield \$
Non-Domestic Waste Small	80 Litre	409.00	58,385
Non-Domestic Waste Medium	120 –140 Litre	545.00	91,015
Non-Domestic Waste Large	240 Litre	1,035.00	326,025

* Limited to one service per rateable property

Additional Non-Domestic Bins are available to non-domestic properties and are priced as shown below. A full Non-Domestic Waste Service must be applied before additional bins can be requested.

Additional Non-Domestic Waste Bins *	Bin Size	Annual Charge \$
Weekly Food Organic & Garden Organic	240 Litre	133.30
Fortnightly Recycling	240 Litre	63.40

* A maximum of 3 Additional Non-Domestic Bins may be purchased.

INTEREST CHARGE FOR OVERDUE RATES & CHARGES

Interest will be charged on all overdue Rates and Charges. The interest rate applicable to overdue rates and charges is set in accordance with the maximum charge determined by the Office of Local Government. The charge is set as a percentage per annum of simple interest calculated and is applied on a daily basis.

Upon notification of a ratepayer's death, Council will grant a 12 month interest free period to allow for probate or Letters of Administration to be processed. After the 12 month period or the property is transferred, whichever comes first, interest accrues at the prescribed rate.

LATE PAYMENT FEES – SUNDRY DEBTORS

The late payment fee for 2026-2027 will be \$11.50. This fee will apply to all sundry debtor accounts that are overdue by greater than 60 days at the time a reminder letter is processed.

HARDSHIP

Council recognises that due to exceptional circumstances, ratepayers may at times encounter difficulty paying their annual rates and charges. Council has a Debt Recovery and Hardship Assistance Policy that provides a framework for providing relief to any ratepayers who are suffering genuine financial hardship.

FEES & OTHER CHARGES

In accordance with Section 608 of the Local Government Act 1993, Council advises a range of fees as scheduled in this document.

Generally, these fees are intended to cover the following:

- supply of a service, product or commodity;
- providing information;
- providing a service in connection with the Council's regulatory functions, including receiving an application for approval, granting an approval, making an inspection and issuing a certificate, and
- allowing admission to any building or enclosure.

The income received from these fees and charges will reduce the level of cross subsidisation and inherent in-service provision from general rates.

Section 610 of the Local Government Act 1993 states that a fee should not be determined if it is inconsistent with the amount determined under another Act or is in addition to the amount determined under another Act.

The Local Government Act 1993 provides the framework for setting fees. Fees and other charges have generally been adjusted in line with the estimated increases for 2026-2027 of 4.7%. Some prices vary outside the index based on specific issues impacting the operations, costs, or pricing parameters of the particular service. Regulatory or statutory fees will vary in line with government pronouncements and be set to the maximum at that time.

Fees have been set for various activities after giving due consideration to the Local Government Act and the following factors:

- The cost to Council of providing the service.
- The importance of the service to the community.
- The price fixed by the relevant industry body.
- Any factors specified in the Local Government regulations.
- Market rates/pricing.

All Rates, Fees and Charges are set at the maximum and can be adjusted in accordance with this Revenue Policy which allows for a discount, exemption or waiver of fees to be given where specifically included in the schedule of Rates, Fees and Charges or provided for under a Council policy. Discounts, exemptions, or a waiver of fees outside these delegations can only be approved by the General Manager. The criteria for the delegated application of the discount, exemption or waiver is defined in the schedule of Rates, Fees and Charges or a stand-alone policy. A list of these policies is provided in the

Appendix to the schedule of Rates, Fees and Charges. Requests granted by the General Manager outside of the Policy are to be entered into a register and reported to the Audit, Risk and Improvement Committee at regular intervals.

The following pricing categories have been used in determining the fees, which are summarised below:

- Full Cost Pricing - Fees and charges are set to enable the recovery of all direct and indirect costs involved in the provision of a service.
- Subsidised Pricing - Fees and charges are set at a level that recovers less than the full cost incurred in service delivery. In effect, some level of subsidisation is factored into the price.
- Rate of Return Pricing - Fees and charges are set to enable the recovery of all direct and indirect costs involved in the provision of a service plus a profit margin.
- Market Pricing - Fees and charges are based on current market fee structures. The market price is usually determined by examining competitors' prices and may have little relationship to the cost of providing the service.
- Statutory Pricing - Fees and charges are set to comply with statutory legislation.
- Rate of Return/Market Pricing – Fees and charges that are a combination of Rate of Return and Market Pricing and relate to Waste Services.

Goods and Services Tax (GST) has been included in the fees and charges on those items subject to GST. Some fees and charges are GST free under Division 38 and some are exempt from GST under Division 81 of the Goods and Services Tax Act 1999.

In general, those fees and charges that are of a regulatory nature are exempt from GST, whereas those that constitute a fee for service or competitive supply will be subject to GST.

Council has identified its Category 1 Business Activities for the purpose of competitive neutrality. Category 1 businesses have a gross turnover greater than \$2M; they are:

- Tourist Parks
- Waste Disposal
- Leisure Centres

National Competition Policy requires disclosure of the pricing methods Council used in determining the fees and charges of these declared business activities. The pricing methods Council used in determining these fees and charges are detailed below.

In accordance with Pricing and Costing for Council Businesses – A Guide to Competitive Neutrality, a document published by the NSW Department of Local Government [now Office of Local Government], Wollongong City Council has declared that the following are to be considered as business activities and these business activities have income earned from fees and charges.

Tourist Parks

The Tourist Parks' function is concerned with the operation, management and development of caravan parks (tourist parks) at Bulli, Corrimal and Windang to achieve the best available financial return and the provision of a high standard amenity to park patrons and local residents. Key activities for this function include:

- Operation of the Tourist Parks
- Maintenance of Tourist Park grounds, buildings and surrounds
- Marketing
- Provision of additional facilities and accommodation types

The pricing method used in determining Tourist Parks' Fees and Charges is the market pricing method whereby fees and charges are based on current market fee structures. The market price is usually determined by examining competitors' prices and may have little relationship to the cost of providing the service. It is anticipated that it will not be necessary for Council to subsidise this business activity.

Waste Disposal

The Waste Disposal function manages the disposal of solid waste generated within the city. This function works closely with the waste collection and recycling function to ensure waste is disposed of in a manner which best utilises limited landfill resources. The key activities of this function are:

- Landfill management
- Environmental control
- Rehabilitation of closed landfill sites

The pricing method used in determining Waste Disposal Fees and Charges is the rate of return/market pricing method. This is where fees are set to enable the recovery of all direct and indirect costs involved in the provision of a service plus a profit margin taking into account market factors. It is anticipated that it should not be necessary for Council to subsidise this business activity.

Health & Fitness

This function is responsible for the management and upkeep of Council's leisure centres. The key activity of this function is:

– Management of the commercial leisure centres

The pricing methods used in determining Health & Fitness fees and charges are the market, full, statutory and subsidised pricing methods. Market price is based on current market fee structures and is usually determined by examining competitors' prices and may have little relationship to the cost of providing the service. Full cost pricing is where fees and charges are set to enable the recovery of all direct and indirect costs involved in the provision of a service. Statutory pricing is where fees and charges are set to comply with statutory legislation. Subsidised pricing is where fees and charges are set at a level that recovers less than the full cost incurred in service delivery. In effect, some level of subsidisation is factored into the price.

It is anticipated Council will be subsidising this business activity due to the service being provided on a less than cost recovery basis.

Charges for Works Carried Out on Private Land

Council's Policy in relation to charges for works on private land arises from two different types of activities.

- 1 Where work is carried out on private property by Council labour utilising materials purchased by Council, the work is charged at full cost recovery including all administrative overheads.
- 2 For works requiring the clearing of land or of such other regulatory nature, Council has a policy of employing private contractors to perform the work. Council adds to the contractor's charges an amount to cover the cost of overseeing the adequacy of the work performed. This amount will be \$190.00 (including GST) during the 2026-2027 financial year.

GLOSSARY

Rating Categories

All land is categorised in accordance with the Local Government Act 1993.

- Residential Rates

Land is categorised as 'residential' if it is a parcel of rateable land valued as one assessment, and:

- i its dominant use is for residential accommodation, or
- ii in the case of vacant land, is zoned or otherwise designated for use for residential purposes under an environmental planning instrument.

Council has determined that 50% of its residential rate income will be levied as a base amount.

- Farmland Rates

Land is categorised as farmland if it is a parcel of rateable land valued as one assessment and it must be:

- i the dominant use of which is for farming (that is, the business or industry as it is defined within the Act) which
- ii has a significant and substantial commercial purpose or character, and
- iii is engaged in for the purpose of profit on a continuous or repetitive basis (whether a profit is made, or not).

- Mining Rates

Land is categorised as mining if it is a parcel of rateable land valued as one assessment and it is the dominant use of a coal mine or metalliferous mine.

- Business Rates

Land is categorised as 'business' if it cannot be categorised as farmland, residential or mining. Council has six sub-categories for the 'business' category:

- I Ordinary
- II Commercial
- III 3c Regional Business
- IV Light Industrial
- V Heavy Industrial
- VI Heavy 1 Activity 1

OCCUPATION FEE FOR HOLIDAY VANS

The annual fee is to be paid in four equal instalments. Occupation fees are payable in advance on the first day of every quarter (1 July, 1 October, 1 January, and 1 April), the final quarter being 1 April.

Council may give notice of termination of an occupation agreement if the occupant fails to pay the occupation fees in accordance with Term 11 of the agreement.

Alternatively, a discount of 2.5% is available to an occupant who pays the annual fee as a lump sum by the due date of the first quarter fees, commencing 1 July.

The fee is set by Council on an annual basis and is applicable for the period 1 July to 30 June.

Continued occupation of site after termination (Holiday Vans) – storage fee	Full	Y	Fee to accrue at daily rate of occupation fees until site is cleared.	
			Last year fee Fee to accrue at daily rate of occupation fees until site is cleared.

WASTE MANAGEMENT

Commercial or business waste is not accepted as household waste, assessed by Weighbridge Operator(s).

Garden Organics are not accepted to landfill and must be separated from mixed general waste and be free of contamination for depositing in the garden organics drop off area.

Specified items are required to be deposited in recycling areas prior to mixed general waste being deposited for disposal.

Failure of site users to follow directions may result in specified item(s) weights being included in mixed general waste charges.

Wollongong Waste and Resource Recovery Park is not permitted to accept builders waste for landfill disposal including mixed soils, concrete, bricks, tiles, plasterboard, wood waste and general mixed builders waste.

Asbestos material is not accepted at Wollongong Waste and Resource Recovery Park.

The Product Stewardship Act, 2011 effective 1 July 2012 provides for televisions, computers and computer peripherals to be accepted for recycling by an 'Approved Arrangement' free of charge, providing the material presented meets industry standards.

Exemptions apply in accordance with the Wollongong Waste and Resource Recovery Park - Fees and Exemption Policy for Community Service Organisations with a valid NSW Waste Levy Exemption from the NSW Environment Protection Authority.

WOLLONGONG WASTE AND RESOURCE RECOVERY PARK

HOUSEHOLD WASTE

Mixed General Waste

Minimum charge (40kg or less)	Rate of Return	Y	\$19.40	\$20.50

On Dharawal Country, from the mountains to the sea, we value our natural environment, we respect each other, our past and future. We will be a sustainable, connected, vibrant, and innovative city, with a diverse economy.

We are a sustainable and climate resilient city

We have well planned, connected, and liveable places

We foster a diverse economy, and we value innovation, culture, and creativity

We have a healthy, respectful, and inclusive community
